📍 Pasadena, CA 📞 (781)-985-0881

I am a computer scientist and mathematician interested in the synthesis and transportability of knowledge from and between multiple data sources. My work spans the fields of causality, data fusion, and distribution shift. I am currently pursuing a Ph.D. in Computing and Mathematical Sciences at Caltech supported by a NSF Graduate Research Fellowship and an Amazon AI4Science Fellowship.

EDUCATION

California Institute of Technology - Pasadena, CA

Oct 2017 - present

Ph.D. Candidate

NSF Graduate Research Fellowship

Amazon AI4Science Research Fellowship

Cambridge University (Emmanuel College) - Cambridge, UK

Oct 2016 - Jun 2017

Mathematics Part 1B

Supported by a Herchel Smith Fellowship

Additional classes in Computer Science and Mathematics Part II

Williams College - Williamstown, MA

Sep 2012 - Jun 2016

Bachelor of Arts

Majors: Physics and Computer Science, GPA: 3.92

Honors: Highest Honors (Physics), Phi Beta Kappa, Sigma Xi, Magna Cum Laude

RESEARCH TOPICS

Data Fusion: Most datasets restrict their focus to a subset of topics. We have developed “Expert Graphs” to study consistencies and inconsistencies in partial, but overlapping expertise. As it turns out, this problem is deeply related to issues in voting theory, such as the Cordocet Paradox.

Mixture Models for Causality: Combining datasets induces universal confounding on a structural equation model (SEM). Controlling for such a confounder involves treating each dataset separately, defeating the purpose of the combined dataset. Assuming a bound on the number of types of sources turns the problem into a mixture model, allowing identification of within-source probability distributions. This perspective expands the notion of causal identifiability, as many graphically unidentifiable relationships can be identified.

Domain Adaptation and Transportability: I am interested in using causal principles to guide models that are robust to distribution shift in datasets. Forthcoming work completed at the Amazon Causality Lab uses concepts from causality and information theory to inform how auxiliary training tasks can improve robustness to distribution shift.

WORK EXPERIENCE

Amazon Research Causality Lab - Tübingen, Germany

Oct 2022 - Feb 2023

Applied Scientist Intern (L5)

Worked with Mila Hardt, Atalanti Mastakouri, and Dominik Janzing

Paper submitted to UAI 2023

BioDiscovery - El Segundo, CA

Jun 2017 - Sep 2017

Intern

Unsupervised learning on cancer genomes. Developed and implemented methods that lead to a conference poster.

IBM T.J. Watson Research Center - Yorktown Heights, NY

Jun 2016 - Sep 2016

Intern

Worked with Dr. Victor Kravets (mentor) and Dr. Andrew Sullivan (manager).

Projects included non-greedy and map-reduce algorithms for factoring sum of products

TEACHING EXPERIENCE

Markov Chain Monte Carlo

Spring 2022

Head TA for Leonard Schulman's new class.

PUBLICATIONS

S. Gordon, ***B. Mazaheri**, Y. Rabani, L. Schulman. "*Identifying Discrete Mixtures of Bayesian Networks.*"

Accepted to CLEAR 2023.

S. Jain, **B. Mazaheri**, N. Raviv, J. Bruck. “*Mutation profile and related labeled genomic components, methods and systems.*” 2019.

PROJECTS

LACCTiC.com	<i>Sep 2021 - present</i>
Website for ranking collegiate cross country with 10,000 regular users.	
Algorithms/machine learning for adjusting times in different conditions.	
Backend using Django, frontend using React, database hosted on AWS.	

AWARDS

National Science Foundation Graduate Research Fellowship	<i>Awarded Spring 2019</i>
Awarded in 2019 for a proposal to research confounding influence in causal networks.	
Amazon AI4Science Research Fellowship	<i>Awarded Spring 2022</i>
Funding for research with the potential to aid scientific discovery.	

WORKSHOPS

Simon’s Institute for Theory of Computing: Causality	<i>Spring 2022</i>
4 week workshop on Causal Inference methods.	

TALKS

Simon’s Institute for Theory of Computing: Causality Reunion	<i>To be given May 2023</i>
Title: “Causal Discovery under Limited Global Confounding”	

MENTORSHIP

Caltech Cross Country Team	<i>Sep 2018 - present</i>
<i>Assistant Coach</i>	
Mentoring and supporting undergraduate students at Caltech.
